

# ADSL2+ Router CL-110 / CL-110-I

Broadband

Surf the internet, do emails and run multi-media at DSL Speed. On several computers all at the same time - save through the builtin firewall.

1 Ethernet port to connect the computer.

USB slave port to connect an additional computer to the home network.

The SIEMENS CL-110 Router integrates a ADSL2+ modem, router and firewall in one device. Data access is provided via Ethernet or USB port.

Security is supported via a double Stateful Packet Inspection and NAT based firewall. VPN Pass-through and DMZ support provides additional security support for telecommuters as well as allow flexibility while maintaining security against malicious hackers.

With Universal Plug and Play (UPnP) support, home networking becomes a breeze for everyone in the family. Multi Port Range/Popular Application Forwarding makes it even easier to select which application you want your network to allow while ensuring your security at the same time.
